MSDS.000159

Argomix H35

SECTION 3: Composition/information on ingredients

3.1. Substances

Not applicable

3.2. Mixtures

Name	Product identifier	%	Classification according to Regulation (EC) No. 1272/2008 [CLP]
Argon	CAS-No.: 7440-37-1 EC-No.: 231-147-0 EC Index-No.: REACH-no: *1	65	Press. Gas (Comp.), H280
hydrogen	CAS-No.: 1333-74-0 EC-No.: 215-605-7 EC Index-No.: 001-001-00-9 REACH-no: *1	35	Flam. Gas 1A, H220 Press. Gas (Comp.), H280

Full text of H- and EUH-statements: see section 16

Contains no other components or impurities which will influence the classification of the product.

*1: Listed in Annex IV / V REACH, exempted from registration.

*3: Registration not required: Substance manufactured or imported < 1t/y.

SECTION 4: First aid measures	
4.1. Description of first aid measures	
Inhalation	: Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm

Skin contact	
Eye contact	
Ingestion	

- and rested. Call a doctor. Perform cardiopulmonary resuscitation if breathing stopped. : Adverse effects not expected from this product.
- : Adverse effects not expected from this product.
- : Ingestion is not considered a potential route of exposure.

4.2. Most important symptoms and effects, both acute and delayed

In high concentrations may cause asphyxiation. Symptoms may include loss of mobility/consciousness. Victim may not be aware of asphyxiation. See section 11.

4.3. Indication of any immediate medical attention and special treatment needed

	None.
SECTION 5: Firefighting measures	
5.1. Extinguishing media	
0 0	 Shutting off the source of the gas is the preferred method of control. Do not use water jet to extinguish.
5.2. Special hazards arising from the substance or	mixture
•	Exposure to fire may cause containers to rupture/explode.
5.3. Advice for firefighters	
Specific methods :	 Do not extinguish a leaking gas flame unless absolutely necessary. Spontaneous/explosive re-ignition may occur. Extinguish any other fire. Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat radiation may cause gas receptacles to rupture. Cool endangered receptacles with water spray jet from a protected position. Prevent water used in emergency cases from entering sewers and drainage systems. If possible, stop flow of product. Use water spray or fog to knock down fire fumes if possible. Move containers away from the fire area if this can be done without risk.

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Version: 1.0 Revision date: 13/12/2022 Issue date: 13/12/2022

MSDS.000159

Argomix H35

Special protective equipment for fire fighters	: In confined space use self-contained breathing apparatus.	
	Standard protective clothing and equipment (Self Contained Breathing Apparatus) for fire fighters.	
	Standard EN 469 - Protective clothing for firefighters. Standard - EN 659: Protective gloves for	
	firefighters.	
	Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.	

SECTION 6: Accidental release measures 6.1. Personal precautions, protective equipment and emergency procedures For non-emergency personnel Act in accordance with local emergency plan. Try to stop release. Evacuate area. Eliminate ignition sources. Ensure adequate air ventilation. Stav upwind. See section 8 of the SDS for more information on personal protective equipment For emergency responders Monitor concentration of released product. Consider the risk of potentially explosive atmospheres. Wear self-contained breathing apparatus when entering area unless atmosphere is proved to be safe. See section 5.3 of the SDS for more information. 6.2. Environmental precautions Try to stop release. 6.3. Methods and material for containment and cleaning up Ventilate area. 6.4. Reference to other sections See also sections 8 and 13.

SECTION 7: Handling and storage 7.1. Precautions for safe handling

Safe use of the product

: Assess the risk of potentially explosive atmospheres and the need for explosion-proof equipment. Purge air from system before introducing gas. Take precautionary measures against static discharge. Keep away from ignition sources (including static discharges). Consider the use of only non-sparking tools. Ensure equipment is adequately earthed. The product must be handled in accordance with good industrial hygiene and safety procedures. Only experienced and properly instructed persons should handle gases under pressure. Consider pressure relief device(s) in gas installations. Ensure the complete gas system was (or is regularily) checked for leaks before use. Do not smoke while handling product. Use only properly specified equipment which is suitable for this product, its supply pressure and temperature. Contact your gas supplier if in doubt. Avoid suck back of water, acid and alkalis Do not breathe das Avoid release of product into work area.

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Version: 1.0 Revision date: 13/12/2022 Issue date: 13/12/2022

MSDS.000159

Safe handling of the gas receptacle	: Do not allow backfeed into the container.
	Protect containers from physical damage; do not drag, roll, slide or drop.
	When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to
	transport cylinders.
	Leave valve protection caps in place until the container has been secured against either a wall or bencl or placed in a container stand and is ready for use.
	If user experiences any difficulty operating valve discontinue use and contact supplier.
	Never attempt to repair or modify container valves or safety relief devices.
	Damaged valves should be reported immediately to the supplier.
	Keep container valve outlets clean and free from contaminants particularly oil and water.
	Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment.
	Close container valve after each use and when empty, even if still connected to equipment.
	Never attempt to transfer gases from one cylinder/container to another.
	Never use direct flame or electrical heating devices to raise the pressure of a container.
	Do not remove or deface labels provided by the supplier for the identification of the content of the container.
	Suck back of water into the container must be prevented.
	Open valve slowly to avoid pressure shock.
7.2. Conditions for safe storage, includin	ng any incompatibilities
	Segregate from oxidant gases and other oxidants in store.
	Segregate from oxidant gases and other oxidants in store. All electrical equipment in the storage areas should be compatible with the risk of a potentially explosiv atmosphere.
	All electrical equipment in the storage areas should be compatible with the risk of a potentially explosiv
	All electrical equipment in the storage areas should be compatible with the risk of a potentially explosiv atmosphere.
	All electrical equipment in the storage areas should be compatible with the risk of a potentially explosiv atmosphere. Observe all regulations and local requirements regarding storage of containers.
	All electrical equipment in the storage areas should be compatible with the risk of a potentially explosiv atmosphere. Observe all regulations and local requirements regarding storage of containers. Containers should not be stored in conditions likely to encourage corrosion.
	All electrical equipment in the storage areas should be compatible with the risk of a potentially explosiv atmosphere. Observe all regulations and local requirements regarding storage of containers. Containers should not be stored in conditions likely to encourage corrosion. Container valve guards or caps should be in place. Containers should be stored in the vertical position and properly secured to prevent them from falling
	All electrical equipment in the storage areas should be compatible with the risk of a potentially explosiv atmosphere. Observe all regulations and local requirements regarding storage of containers. Containers should not be stored in conditions likely to encourage corrosion. Container valve guards or caps should be in place. Containers should be stored in the vertical position and properly secured to prevent them from falling over.
	All electrical equipment in the storage areas should be compatible with the risk of a potentially explosiv atmosphere. Observe all regulations and local requirements regarding storage of containers. Containers should not be stored in conditions likely to encourage corrosion. Container valve guards or caps should be in place. Containers should be stored in the vertical position and properly secured to prevent them from falling over. Stored containers should be periodically checked for general condition and leakage.

7.3. Specific end use(s)

None.

SECTION 8: Exposure controls/person	al protection
8.1. Control parameters	
OEL (Occupational Exposure Limits)	: None available.
DNEL (Derived-No Effect Level)	: None available.
PNEC (Predicted No-Effect Concentration)	: None available.
8.2. Exposure controls	
8.2.1. Appropriate engineering controls	
	Provide adequate general and local exhaust ventilation.
	Product to be handled in a closed system.
	Gas detectors should be used when flammable gases/vapours may be released.
	Consider the use of a work permit system e.g. for maintenance activities.
	Systems under pressure should be regularily checked for leakages.
8.2.2. Individual protection measures, e.g. person	al protective equipment
	A risk assessment should be conducted and documented in each work area to assess the risks related to
	the use of the product and to select the PPE that matches the relevant risk. The following
	recommendations should be considered:
	PPE compliant to the recommended EN/ISO standards should be selected.
Eye/face protection	: Wear safety glasses with side shields.
	Standard EN 166 - Personal eye-protection - specifications.
Skin protection	
Hand protection	: Wear working gloves when handling gas containers.
	Standard EN 388 - Protective gloves against mechanical risk, performance level 1 or higher.

Other	: Consider the use of flame resistant anti-static safety clothing.
	Standard EN ISO 14116 - Limited flame spread materials.
	Standard EN 1149-5 - Protective clothing: Electrostatic properties.
	Wear safety shoes while handling containers.
	Standard EN ISO 20345 - Personal protective equipment - Safety footwear.
Respiratory protection	: When indicated by a risk assessment, Respiratory Protective Equipment must be used. The selection of the Respiratory Protective Device (RPD) must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected RPD.
	Self contained breathing apparatus is recommended, where unknown exposure may be expected, e.g. during maintenance activities on installation systems.
	Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.
Thermal hazards	: None in addition to the above sections.
8.2.3. Environmental exposure controls	
	Poter to local regulations for restriction of amissions to the atmosphere. See section 12 for specific

Refer to local regulations for restriction of emissions to the atmosphere. See section 13 for specific methods for waste gas treatment.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
 Physical state at 20°C / 101.3kPa 	: Gas.
- Colour	: Colourless.
Odour	: Odourless.
	Odour threshold is subjective and inadequate to warn of overexposure.
Melting point / Freezing point	: Not applicable for gases and gas mixtures.
Boiling point	: Not applicable for gas mixtures.
	It is technically not possible to determine the boiling point or range of this mixture. Component with
	lowest boiling point: hydrogen -253 °C
Flammability	: Flammable gas.
Lower explosive limit (LEL)	: Calculated value: 11.03%
Upper explosive limit (UEL)	: No test data or calculation method available.
Flash point	: Not applicable for gases and gas mixtures.
Auto-ignition temperature	: Not known.
	Auto ignition temperature for mixtures is not available. Component with lowest auto-ignition temperature
	: hydrogen 560 °C
Decomposition temperature	: Not applicable.
pH	: Not applicable for gases and gas mixtures.
Viscosity, kinematic	: Not applicable for gases and gas mixtures.
Water solubility [20°C]	: Mixture is partially soluble in water
Partition coefficient n-octanol/water (Log Kow)	: Not available.
Vapour pressure [20°C]	: Not applicable.
Vapour pressure [50°C]	: Not applicable.
Density and/or relative density	: Not applicable.
Relative vapour density (air=1)	: Lighter or similar to air.
Particle characteristics	: Not applicable for gases and gas mixtures.

9.2. Other information

9.2.1. Information with regard to physical hazard classes		
Explosion limits	:	Flammability range not available.
Oxidising properties	:	No oxidising properties.

9.2.2. Other safety characteristics

Other data

: None.

SECTION 10: Stability and reactivity

10.1. Reactivity

10.2. Chemical stability

Data for mixture are not available.

Stable under normal conditions.

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Version: 1.0 Revision date: 13/12/2022 Issue date: 13/12/2022

MSDS.000159

Argomix H35

10.3. Possibility of hazardous reactions	
Reactivity	 Can form explosive mixture with air. May react violently with oxidants. This mixture contains components with the following reactivity : Can form explosive mixture with air. May react violently with oxidants.
10.4. Conditions to avoid	
	Keep away from heat/sparks/open flames/hot surfaces. – No smoking. Avoid moisture in installation systems.
10.5. Incompatible materials	
	Air, Oxidisers. For additional information on compatibility refer to ISO 11114.
10.6. Hazardous decomposition products	
	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological information <u>11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008</u>

Acute toxicity	: No toxicological effects from this product.	
Skin corrosion/irritation	: No known effects from this product.	
Serious eye damage/irritation	: No known effects from this product.	
Respiratory or skin sensitisation	: No known effects from this product.	
Germ cell mutagenicity	: No known effects from this product.	
Carcinogenicity	: No known effects from this product.	
Toxic for reproduction : Fertility Toxic for reproduction : unborn child	No known effects from this product.No known effects from this product.	
STOT-single exposure	: No known effects from this product.	
STOT-repeated exposure	: No known effects from this product.	
Aspiration hazard	: Not applicable for gases and gas mixtures.	
11.2. Information on other hazards		
Other information	: The substance/mixture has no endocrine disrupting properties.	
SECTION 12: Ecological information		
12.1. Toxicity		
Assessment	: No ecological damage caused by this product.	
EC50 48h - Daphnia magna [mg/l] EC50 72h - Algae [mg/l] LC50 96 h - Fish [mg/l]	 No data available. No data available. No data available. No data available. 	
12.2. Persistence and degradability		
Assessment	: No ecological damage caused by this product.	
12.3. Bioaccumulative potential		
Assessment	: No ecological damage caused by this product.	
<u>12.4. Mobility in soil</u>		
Assessment	: No ecological damage caused by this product.	

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Version: 1.0 Revision date: 13/12/2022 Issue date: 13/12/2022

MSDS.000159

Argomix H35

12.5. Results of PBT and vPvB assessment	
Assessment	: Not classified as PBT or vPvB.
12.6. Endocrine disrupting properties	
	The substance/mixture has no endocrine disrupting properties.
12.7. Other adverse effects	
Other adverse effects	: No known effects from this product.
Effect on the ozone layer	: No effect on the ozone layer.
Effect on global warming	: Contains greenhouse gas(es).
	Contact supplier if guidance is required. Do not discharge into areas where there is a risk of forming an explosive mixture with air. Waste gas should be flared through a suitable burner with flash back arrestor. Ensure that the emission levels from local regulations or operating permits are not exceeded.
	Refer to the EIGA code of practice Doc.30 "Disposal of Gases", downloadable at http://www.eiga.eu for
	more guidance on suitable disposal methods. Do not discharge into any place where its accumulation could be dangerous.
	Return unused product in original container to supplier.
List of hazardous waste codes (from Commission Decision 2000/532/EC as amended)	: 16 05 04 *: Gases in pressure containers (including halons) containing hazardous substances.
13.2. Additional information	
	External treatment and disposal of waste should comply with applicable local and/or national regulations.

SECTION 14: Transport information		
14.1. UN number or ID number		
In accordance with ADR / RID / IMDG / IATA / ADN UN-No.	: 1954	
14.2. UN proper shipping name		
Transport by road/rail (ADR/RID)	: COMPRESSED GAS, FLAMMABLE, N.O.S. (hydrogen, Argon)	
Transport by air (ICAO-TI / IATA-DGR)	: Compressed gas, flammable, n.o.s. (hydrogen, Argon)	
Transport by sea (IMDG)	: COMPRESSED GAS, FLAMMABLE, N.O.S. (hydrogen, Argon)	
14.3. Transport hazard class(es)	•	
Labelling		
	2.1 : Flammable gases.	
Transport by road/rail (ADR/RID)		
Class	: 2	
Classification code Hazard identification number	: 1F : 23	
Tunnel Restriction	: B/D - Tank carriage : Passage forbidden through tunnels of category B, C, D and E. Other carriage :	
	Passage forbidden through tunnels of category D and E	
Transport by air (ICAO-TI / IATA-DGR)		
Class / Div. (Sub. risk(s))	: 2.1	
Transport by sea (IMDG)		
Class / Div. (Sub. risk(s))	: 2.1	
Emergency Schedule (EmS) - Fire	: F-D	
Emergency Schedule (EmS) - Spillage	: S-U	
14.4. Packing group		
Transport by road/rail (ADR/RID)	: Not applicable	
Transport by air (ICAO-TI / IATA-DGR)	: Not applicable	
Transport by sea (IMDG)	: Not applicable	
Sapio Produzione Idrogeno Ossigeno Srl	EN (English) MSDS.000159	;

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Version: 1.0 Revision date: 13/12/2022 Issue date: 13/12/2022

MSDS.000159

14.5. Environmental hazards	
Transport by road/rail (ADR/RID)	: None.
Transport by air (ICAO-TI / IATA-DGR)	: None.
Transport by sea (IMDG)	: None.
14.6. Special precautions for user	
Packing Instruction(s)	
Transport by road/rail (ADR/RID)	: P200
Transport by air (ICAO-TI / IATA-DGR)	
Passenger and Cargo Aircraft	: Forbidden.
Cargo Aircraft only	: 200.
Transport by sea (IMDG)	: P200
Special transport precautions	: Avoid transport on vehicles where the load space is not separated from the driver's compartment.
	Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event o
	an accident or an emergency.
	Before transporting product containers:
	- Ensure there is adequate ventilation.
	- Ensure that containers are firmly secured.
	- Ensure valve is closed and not leaking.
	- Ensure valve outlet cap nut or plug (where provided) is correctly fitted.
	- Ensure valve protection device (where provided) is correctly fitted.
14.7. Maritime transport in bulk according	to IMO instruments
	Not applicable.
SECTION 15: Poquilatory information	
SECTION 15: Regulatory information	
15.1 Safety health and environmental rec	ulations/legislation specific for the substance or mixture

EU-Regulations

Restrictions on use Other information, restriction and prohibition regulations Seveso Directive : 2012/18/EU (Seveso III)	 Contains no substance(s) listed on the REACH Candidate List. Contains no substance(s) listed on the PIC list (Regulation EU 649/2012 concerning the export and import of hazardous chemicals). Covered.
National regulations	
Regulatory reference	: Ensure all national/local regulations are observed.
15.2. Chemical safety assessment	
	A CSA does not need to be carried out for this product.

SECTION 16: Other information

Indication of changes

: Not applicable.

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878 Version: 1.0 Revision date: 13/12/2022 Issue date: 13/12/2022

	STOT - RE : Specific Target Organ Toxicity - Repeated Exposure
Training advise	UFI : Unique Formula Identifier
Training advice Further information	: Ensure operators understand the flammability hazard.
Further information	 Classification using data from databases maintained by the European Industrial Gases Association (EIGA). Data is maintained in EIGA doc 169 : 'Classification and Labelling Guide', downloadable at : http://www.eiga.eu.
	Classification in accordance with the procedures and calculation methods of Regulation (EC) 1272/2008 (CLP).

Full text of H- and EUH-statements	
Flam. Gas 1A	Flammable gases, Category 1A
Flam. Gas 1B	Flammable gases, Category 1B
H220	Extremely flammable gas.
H221	Flammable gas.
H280	Contains gas under pressure; may explode if heated.
Press. Gas (Comp.)	Gases under pressure : Compressed gas

DISCLAIMER OF LIABILITY

 Before using this product in any new process or experiment, a thorough material compatibility and safety study should be carried out.
 Details given in this document are believed to be correct at the time of going to press.

Whilst proper care has been taken in the preparation of this document, no liability for injury or damage resulting from its use can be accepted.
